U.S. Sugar Program Puts Thousands of North Dakota Jobs At Risk

While the U.S. sugar program benefits one, small, special interest group - U.S. sugar producers - it puts at unnecessary risk more than 600,000 American jobs, including up to approximately 2,200 in North Dakota.

According to 2012 Census data, the top three sectors for sugar-using industry employment in North Dakota are:

- Frozen food manufacturing;
- Cookie, cracker and pasta manufacturing; and
- Bread and bakery product manufacturing.

The Department of Commerce has found that for every one sugar-growing job in the United States saved through high U.S. sugar prices, approximately three American manufacturing jobs are lost. Those are jobs North Dakota cannot afford to lose.

For more information on sugar-using industry employment in North Dakota, click [here](#). For more information on the need for sugar program reform, visit sugarreform.org.

Learn more about nationwide sugar-using industry employment in new fact sheets found [here](#).

We urge members of the North Dakota delegation to cosponsor the bipartisan *Sugar Reform Act of 2015* ([S. 475](#) / [H.R. 1714](#)) today.

Only Congress can fix the U.S. sugar program.

The Coalition for Sugar Reform is an alliance of consumers, food and beverage manufacturers, trade advocates, environmental groups, taxpayer watchdog organizations, responsible government advocates, think tanks and other interests. Our objective is to reform the federal government's intrusive, inefficient, restrictive and outdated sugar program - a decades-old subsidy that has repeatedly failed to provide adequate supplies of sugar to the U.S. market.
